Years of experience to help you with your next sale or acquisition.

Jet Cards

Programs designed to deliver value and convenience.

Safety Ratings & Certifications

ABOUT TOWER AVIATION

TEXAS HERITAGE AND PRESTIGE

Established in September of 2008, Tower Aviation Management LLC, is a Texas limited liability company operating as a Part 135 air carrier. Tower Aviation is based and operates out of the newest privately built airport in Texas. It is because of our location at the Austin Executive Airport (KEDC), that we are able to provide our elite clientele with the best customer service and most modern and up-to-date facility in the state of Texas. With our experience, dedicated staff, commercial allies and total commitment to safety, Tower Aviation offers a holistic approach to private aviation with the expertise to reach the most optimized solutions to charter needs, aircraft management, maintenance, training, crew management and international operations and handling.

FLY A2V

PRIVATE CHARTER SOLUTIONS

Fly A2V is Tower Aviation's Part 135 air carrier operation, operating state of the art, Pro Line 21 avionics equipped Hawker 800XP's, out of its Austin Executive home base. With a wholly owned fleet, we guarantee availability and control of our operations to satisfy our program and jetcard members. This too provides supplemental lift to our aircraft management customers who find in A2V a buffer for when their own aircraft is on the ground due to maintenance, crew unavailability or any other reason.

ALL IN & ALL RIGHT AIRCRAFT MANAGEMENT

We know you mind about how and who takes care of your aircraft, which is why we know you must weigh the benefits:

Adding your aircraft to our operator certificate, and thus growing the pool, allows us to generate cost savings and discounts in hangar space, training, insurance, fuel, FBO fees and services, crew expenses, subscriptions and maintenance. With our current local and international partners, we combine over 50 aircraft to achieve this.

Ease off some of the financial burden of owning and operating an aircraft for too few hours a year and turn it into cash flow generating asset that may offset its own costs or even produce profit. Allowing us to use your aircraft for charter, through our Fly A2V operation, will disperse all of your fixed cost in greater flight hours, while your aircraft is still treated and maintained as your own under our vigilant care.

As we add your aircraft to our pool, you will too enjoy the versatility of using other aircraft when yours is being used, is down for maintenance or simply require a different fit for a different mission. Having your asset in our group also spares you from relying 100% on the same crew when any of the normal human factors (e.g. vacations, illness, etc.), interfere with the normal operation of the aircraft, allowing you the peace of mind of trusting us to operate it with one of our pilots within the pool.

FLY ALL IN

ALL IN & ALL RIGHT
AIRCRAFT MANAGEMENT

◇ OPERATIONAL AND MAINTENANCE EXPERTISE

Have the peace of mind of being in the hands of one of the most seasoned teams in the industry. We are experts in managing, along with our local and international partners, over 50 aircraft, and although we can manage any brand or model, we are particularly focused on the following:

< LEARJET 40/45/75 >

< HAWKER 750/800/900 (Pro Line 21) >

< BEECHJET 400 / HAWKER 400 >

< CITATION LATITUDE >

< CHALLENGER 605 >

< GULFSTREAM G200 >

We hold a part 145 MRO certificate for line maintenance, but have gathered the correct ties and links with our MRO partners both in the U.S. and abroad to perform any task, inspection, bulletin, repair or paint and interior job that your aircraft may require. We currently maintain our wholly owned fleet, along with over 40 aircraft of our industry partners.

Providing the little details is all in too, providing on board catering, ground transportation at your destination, arranging travel support for you and your crew and just overall all in dispatch and follow up of our flight.

◇ REGULATORY AND SAFETY EXCELLENCE

We handle all your local, domestic and international travel requirements in a boutique way and be spoke way, making every flight a hassle-free experience. We review trip feasibility and anticipate to any requirements within the U.S. or abroad by national and international authorities such as the Federal Aviation Administration (FAA), International Civil Aviation Organization (ICAO), AFAC (Agencia Federal de Aviación Civil), Occupational Safety and Health Administration (OSHA), and Department of Transportation (DOT), to mention a few.

Assessing all risks is managing safety, that's why we ensure to provide Emergency Response Plans and Safety Management Systems for your operation. Added to this we hire and train the best of crews in the industry, currently employing over 100 pilots with our industry partners. There are many short cuts taken by others; there are non to be taken in aviation, and that is why we have rigorous Aerial Safety department that stays vigilant to every aspect of ours and your operation.

FLY ALL IN

ALL IN & ALL RIGHT
AIRCRAFT MANAGEMENT

◆ CLEAR AND TRANSPARENT SKIES

FLY ALL IN Management means trusting that we will ask all the right questions and challenge all the numbers that operating an aircraft involves and to be presented to you, crystal clear. Our management program takes care of all the personnel requirements, like payroll, taxes, services, health benefits, etc. We too get involved in recruiting, hiring and training administrative, technical or crew personnel and manage on going relationships and conflict resolution. Our finance team works intimately with your financial representative or you to constantly provide clear and transparent invoices, reports and summaries of your aircrafts costs, revenue and operation.

FLY A2V

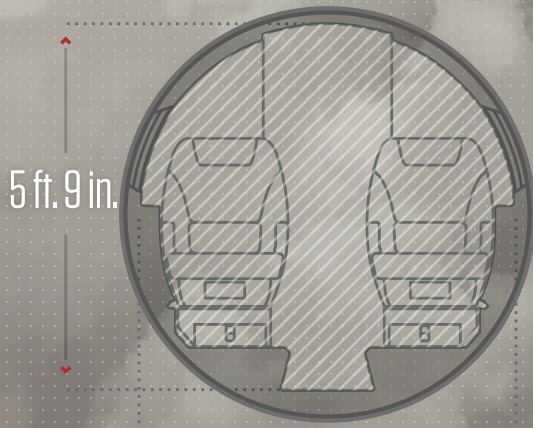

AIRCRAFT BROKERAGE

Our brokerage team has sold over 300 aircraft and is an expert in providing valuations to any kind of aircraft in order to assess its current and future value, operating cost predictions and thus analyze the feasibility of disposing of it or right sizing to a different aircraft and trade it in. We hold the best relationships with the industry leaders such as IADA (International Aircraft Dealers Association), ASA (American Society of Appraisers), Jetcraft, Textron Aviation, etc

HAWKER 800 XP

With its transcontinental capability, and an uninterrupted stand-up headroom throughout the length of the cabin, the Hawker 800XP is the most versatile mid size jet.
